1. INTRODUCTION

1.1 PURPOSE

The purpose of this document is to provide a detailed description for the News Check System which focuses on its requirements and how it will help the public in verifying news. We aim to understand the functionalities of the system and how the system will be used. Additionally, it describes the system's objectives, specifications, including identification and interfaces for each functional requirement. These documents must be presented to the clients for approval and to serve as a reference for the development team to fully understand the system's requirements. (Binding contract with developer/stakeholder)

1.2 SYSTEM IDENTIFICATION

System Title	News Check System	
System Abbreviation	NCS-2024	
System Identification Number	NCS_2024-1	
	Meanings for terms use:	
	NCS	News Check System (System Name)
	2024	Year document created
System Version Number	1	Version of release
	1.0.24	
	This is the initial release for the News Check System to the user.	
	1.0.24	
System Release Number	- Starting with number 1 as the major release. - Middle with number 0 as the minor release number that this is initial version of the system. - Number 24 at the service releases shows that this system is released in 2024.	
Document Identification ID	SRS-NCS-2024	
	Meanings for terms use:	
	SRS	Software Requirement Specification
	NCS	News Check System (System Name)

	<table> <tr> <td>2024</td><td>Year document created</td></tr> </table>	2024	Year document created						
2024	Year document created								
Use Case ID	UC100-NCS-2024 Meanings for terms use: <table> <tr> <td>UC</td><td>Use Case</td></tr> <tr> <td>100</td><td>Number of use case in this system</td></tr> <tr> <td>NCS</td><td>News Check System (System Name)</td></tr> <tr> <td>2024</td><td>Year document created</td></tr> </table>	UC	Use Case	100	Number of use case in this system	NCS	News Check System (System Name)	2024	Year document created

2024	Year document created								

1.3 SYSTEM OVERVIEW

The News Check system is designed to help users in verifying the legitimacy of news articles, social media posts, and other forms of information to minimize the spread of false information. The system acts as a reliable tool by checking articles, sources and data for factual accuracy and reliability. The software of the system involves various users which are public user, administrators and management approver and agency. The system is divided into three modules, each addressing a specific aspect of the verifying news process:

Module 1: Comprehensive profile data for all users.

This module stores detailed profile data for all users, including public user, management approver, administrator and agencies. For public user, they are required to register their contact details, including first name, last name, email address, phone number, username and password. They can subsequently log in to the system using their registered credentials. For administrator, they access the system by using a default username and password to monitor system activity. Management approver and agencies receive their assigned usernames and passwords by the administrator, which they use to login the system. Comprehensive profile data for all users can provide a range of valuable reports depending on the data categories obtained, including total logins over a period, successful logins and failed logins of the user along with the percentage.

Module 2: Capability to submit forms for the verification of news validity.

This module allows public users to report unverified or suspicious news for verification. Public users enter details such as subject, select category, description, news URL, source of the news and evidence before submitting the form. They need to upload relevant evidence such as screenshot comments from the news platform to support their submission. For the category selection, this is to enable user to select the appropriate category such as disaster, economy, education, crime and health. By using this category selection, administrator can quickly assign the submission to the relevant agencies depending on the report. Management approver needs to review the news submission that was submitted by the public user to ensure the details given are correct. For

Agencies, they can view list of the news submission from the public user. Administrators can view the list of the news submission and generate reports showing the list of news forms submitted. These reports will include the submission id, news category, subject, submission date and assigned agency.

Module 3: Classification of complaint forms forwarded to the appropriate authorities.

This module provides for classifying complaints or submissions into appropriate agency categories. Once a public user submits a report, the system analyzes the given details such as subject, select category, description, news URL, news source and evidence. Based on this input, the administrator is assigned to submit the complaint to the relevant agency for further action. Administrators need to see each submission news and classify it by selecting the existing agency in the system. Before the administrator classifies the submission news to the agency, the Management Approver needs to check the submission news first and give a pass or reject response after the public users send their submission news. For agency assignments, they can see all the submission news after the administrator classified the submission news form. Then the new agency can do any response to all submission news that involves their agency. For reports, administrators can generate all news submission reports that are sent the most by public users according to agency.

2. PRODUCT DESCRIPTION

2.1 PRODUCT PERSPECTIVE

Figure 2.1 shows the context diagram of the News Check System. This figure illustrates the overall system functions and interactions within the system. The system involves four external entities which are public person, administrator, management approver and agency.

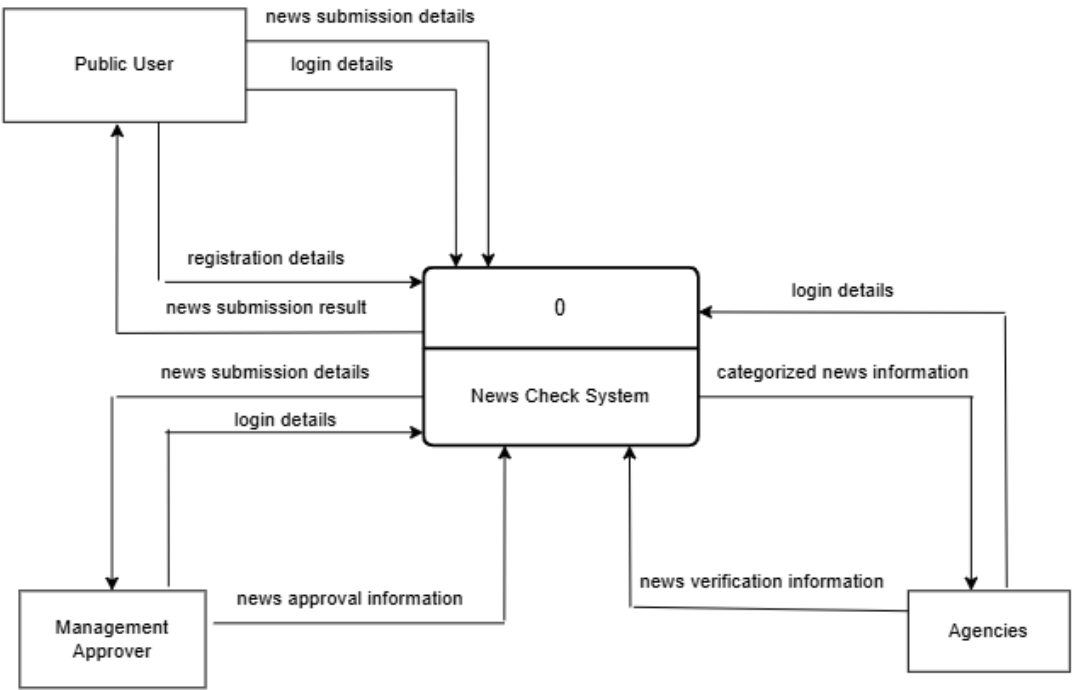

Figure 2.1 Context Diagram of News Check System

2.2 PRODUCT FUNCTION

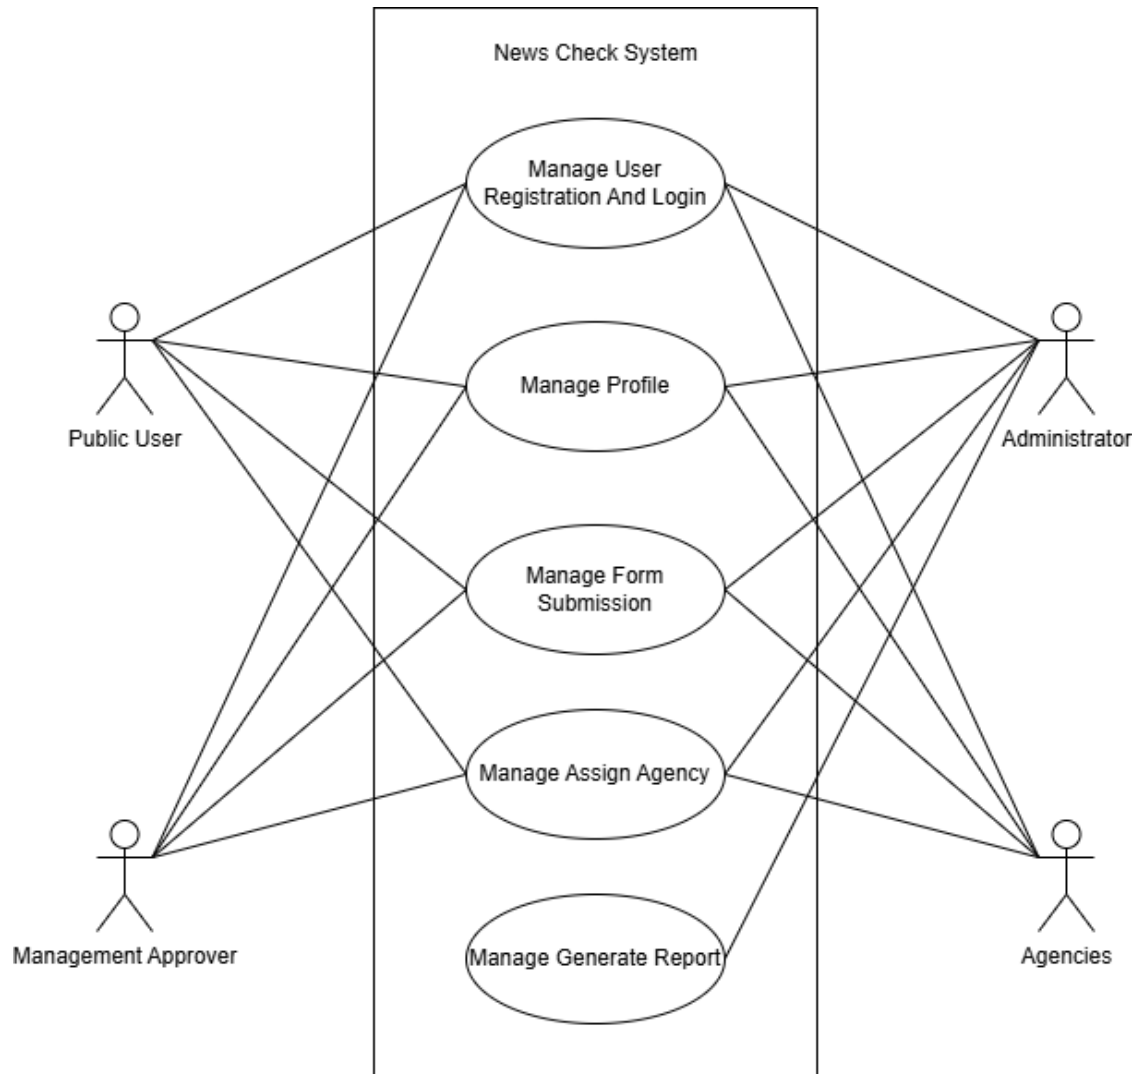

Figure 2.2 Use Case Diagram of News Check System

2.3 USER CHARACTERISTICS

The News Check System (NCS) has four main users:

User	Educational Level	Experience	Technical Expertise
Public User	Basic education to higher education.	Have experience with similar systems.	Proficient in using basic internet and capable of filling in verifying news forms.
Administrator	At least diploma or bachelor's degree in IT, computer science or related field.	Know how to manage system operation and digital platform.	Proficient in database management and monitoring system workflow.
Management Approver	At least diploma or bachelor's degree in public administrator or related field.	Experience in decision-making, reviewing and approving processes.	Proficient in navigating the system to review and approve reports.
Agencies (e.g. PDRM, KKM, KPM, JBPM, MOF)	Bachelor's degree or training in their specialized field relevant to the agencies	Experience in analyzing the verifying news form and can verify the news based on data from their agencies.	Proficient in investigating digital evidence to verify the authenticity of news sources.

3. SPECIFIC REQUIREMENTS (SOFTWARE PRODUCT FEATURES)

3.1 Manage User Registration and Login

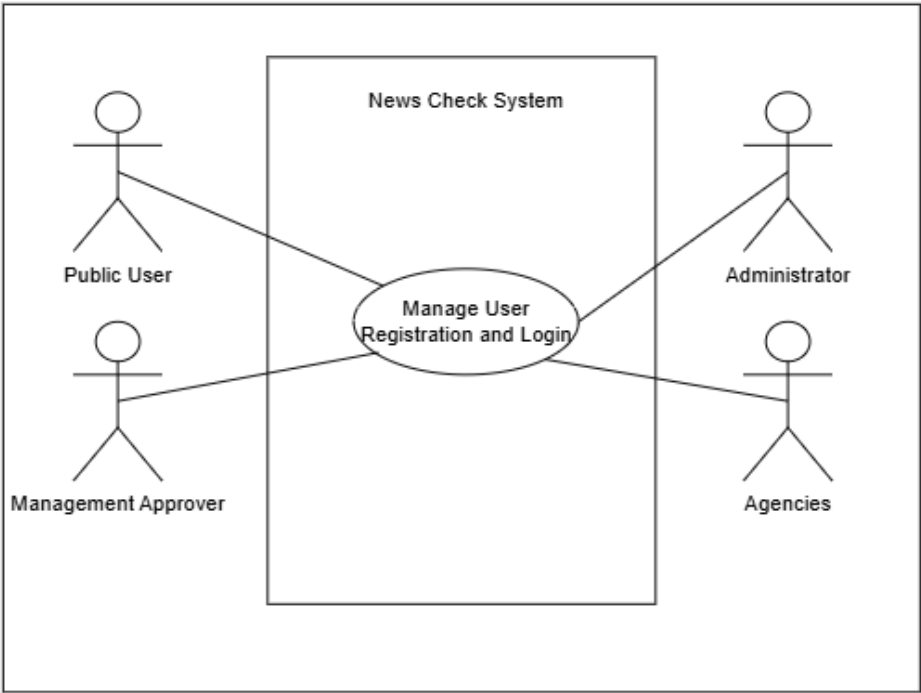

Figure 3.1 Manage User Registration and Login Use Case

3.1.1 Manage User Registration and Login Use Case Description

Table 3.1 Use Case Description for Manage User Registration and Login

Use Case ID	UC-100-NCS-2024
Brief Description	This use case allows users to register and login to their accounts respectively.
Actor	Public user, administrator, agencies and management approver
Pre-Conditions	1. The user must have a strong internet connection. 2. Administrator, agencies and management approver must receive default login credentials.
Basic Flow	Use case begins when Public User Registration 1. Public user navigates to the registration page.

	- The system prompts public user to give details such as first name, last name, valid email and phone number, username and password. - The public user enters required information. - Public user clicks <<SIGN UP>> button to register. [RQ-101-NCS-2024] - The system validates given details. [A1: Registration Failure] - The system displays a success message. - The use case ends. Users (Administrator/Agencies/Management Approver/Public Person) Login - The user navigates to the login page. - The system prompts the user for username and password. - The user enters registered username and password. - The user clicks <<LOGIN>> button. [RQ-102-NCS-2024] - The system verifies credentials. [A2: Incorrect Login Credentials] [A3: Forgot Password] - The system enables access to the dashboard. - The use case ends.
Alternative Flow	A1: Registration Failure - The system displays an error message. - The use case continues to step 2 in basic flow. (Public User Registration) A2: Incorrect Login Credentials - The system displays an error message. - The use case continues to step 2 in basic flow. (Users Login) A3: Forgot Password - The user clicks <<FORGOT PASSWORD>> option on the

	login page. [C1 – Constraint 1] - The system prompts the user to enter their email address linked to the account. - The user enters email address to reset the password. - The system prompts the user to enter new password. - The user enters and confirm the new password. - The system validates the new password. [A4: Passwords Do Not Match] - The user clicks <<RESET PASSWORD>> button. [RQ-103-NCS-2024] - The system displays a success message. The use case continues to step 2 in basic flow. (Users Login)
Exception Flow	None
Post-Conditions	- The system stores public users' details after registration. - Users are successfully logged into the system.
Rules	- Password must have at least minimum 8 characters, with one uppercase letter, one lowercase letter, one number and one special character. - All users have different access levels in the system.
Constraints	C1: Maximum Password Reset Requests A user can request a password reset only one time within 24 hours to prevent misuse.

3.1.3 Manage User Registration and Login User Interface

The image shows a registration form titled "Create new account." on a blue background. The form is a white card with rounded corners. It contains the following fields: "First Name" and "Last Name" (side-by-side), "Email", "Phone Number", "Username", and "Password" (all stacked vertically). Below these fields is a dark blue "Sign Up" button. At the bottom of the card, it says "Already have an account? [Sign in](#)".

Figure 3.8 Registration for Public User

The image shows the same registration form as Figure 3.8, but with an error message. A red rectangular box at the top of the form contains the text: "Something went wrong during registration. Please check your details and try again." The form fields and "Sign Up" button are still visible below the error message.

Figure 3.9 Registration Failure for Public User

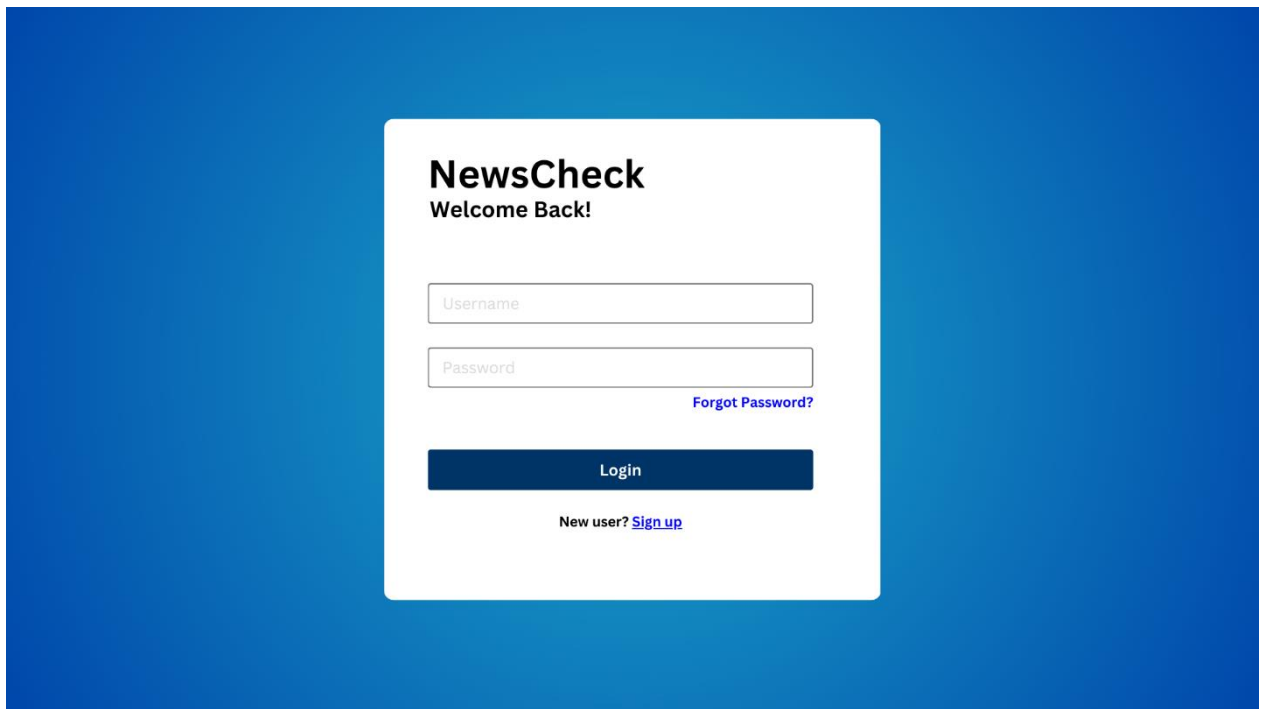

Figure 3.10 Login for Public User, Admin, Agencies and Management Approver

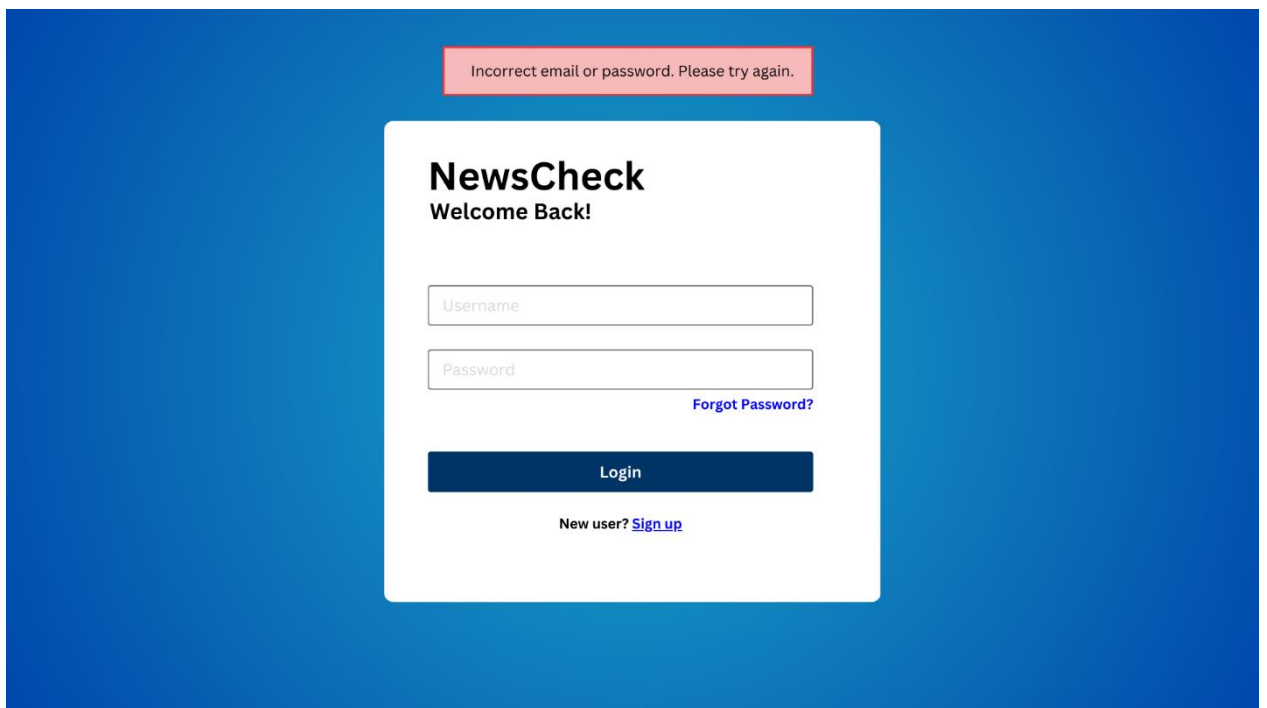

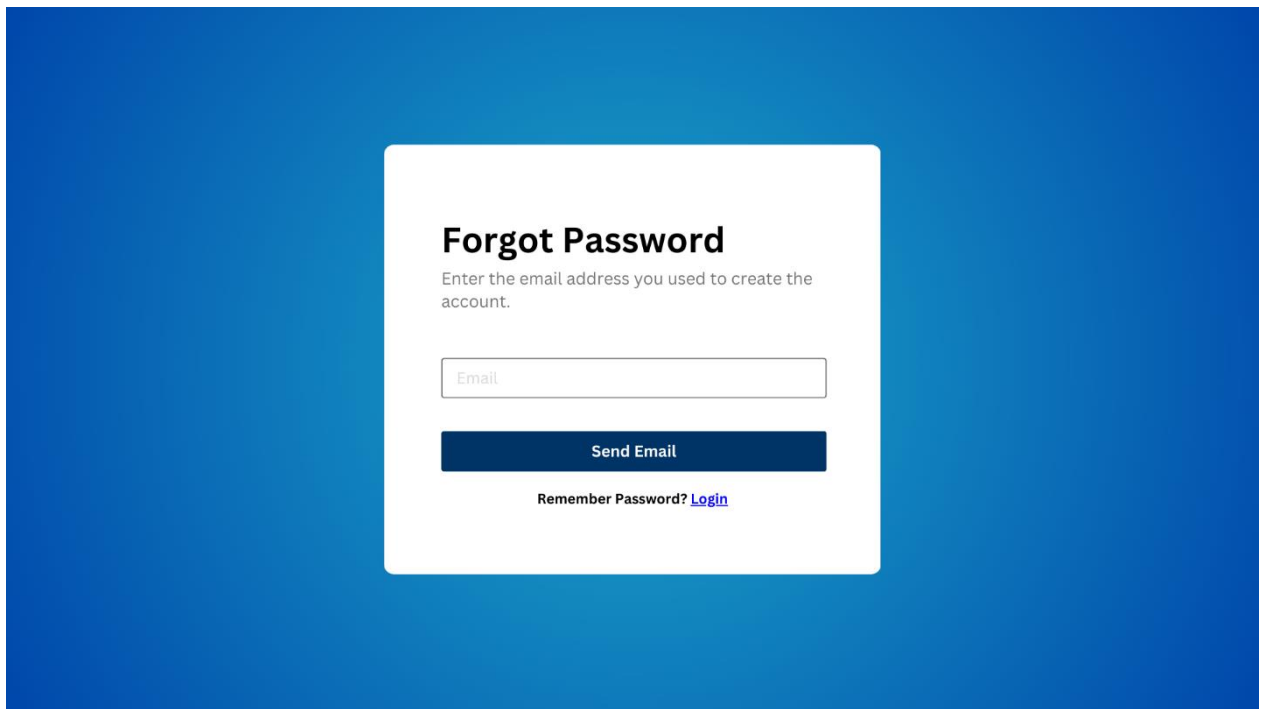

Figure 3.11 Incorrect Login

A screenshot of a web form titled "Forgot Password" on a blue gradient background. The form is a white rounded rectangle. It contains a title, a subtitle, an email input field, a "Send Email" button, and a "Remember Password? Login" link.

Forgot Password

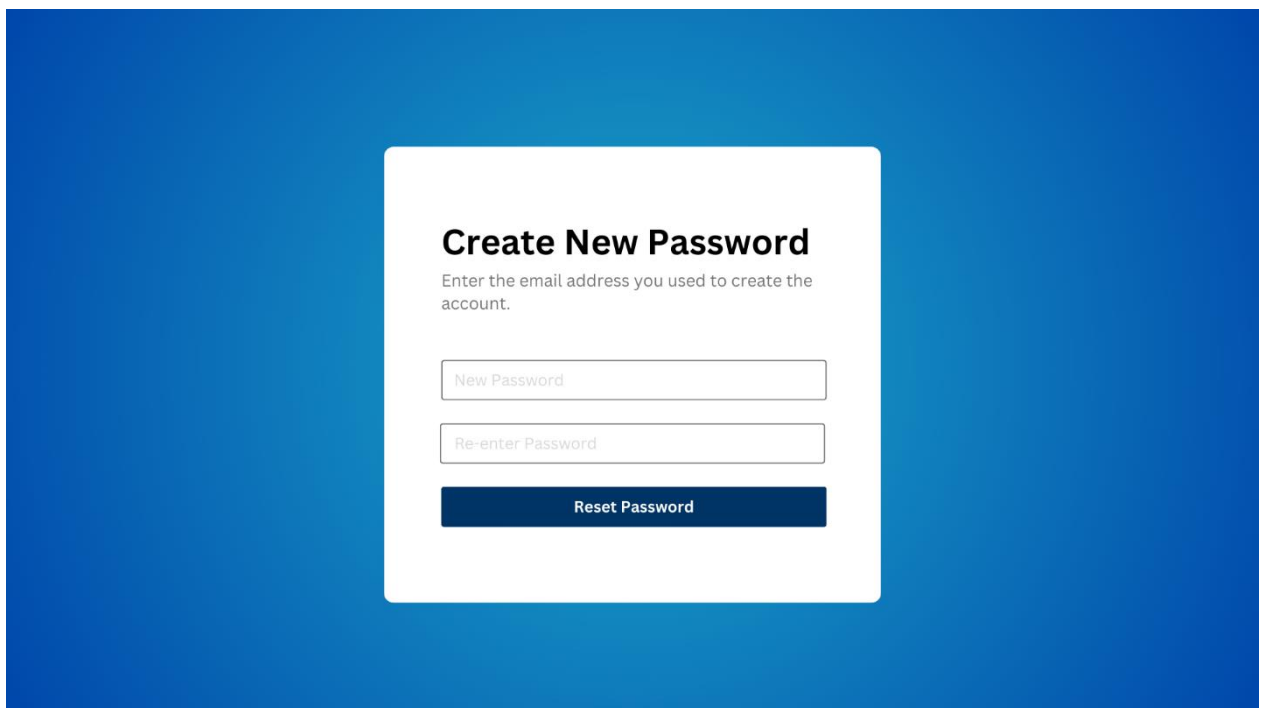

Enter the email address you used to create the account.

Email

Send Email

Remember Password? [Login](#)

Figure 3.12 Forgot Password for Public User, Admin, Agencies and Management Approver

A screenshot of a web form titled "Create New Password" on a blue gradient background. The form is a white rounded rectangle. It contains a title, a subtitle, two password input fields, and a "Reset Password" button.

Create New Password

Enter the email address you used to create the account.

New Password

Re-enter Password

Reset Password

Figure 3.13 Reset Password for Public User, Admin, Agencies and Management Approver

Table 3.2 Manage User Registration and Login - User Interface Description

User Interface Name	Description
Registration	This page allows Public User to create an account in this system by entering needed details such as email and phone number.
Registration Failure	This page appears when there are issues during registration such as invalid email address.
Login	This page allows all users to access to their account respectively by entering username and password.
Incorrect Login	This page informs all users when their login attempts are unsuccessful due to invalid credentials.
Forgot Password	This page assists all users to regain access to their accounts by entering linked email to their account. After submitting the email, user will receive verification code.
Reset Password	This page enables all users to reset their password after verifying the identity.

3.2 Manage Profile

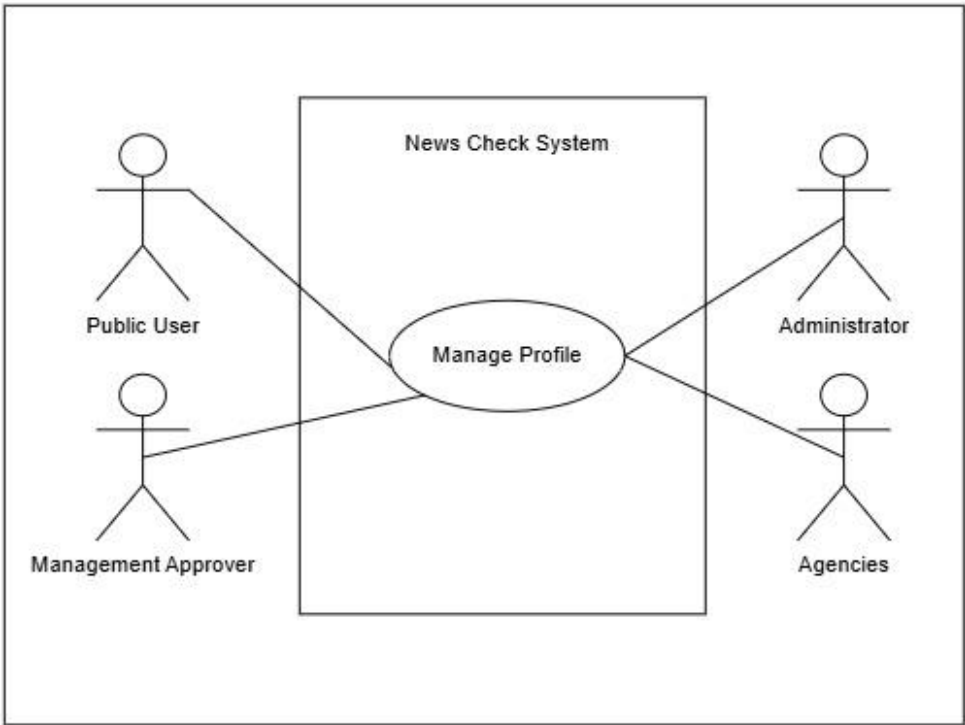

Figure 3.14 Manage Profile Use Case

3.2.1 Manage Profile Use Case Description

Table 3.3 Use Case Description for Manage Profile

Use Case ID	UC-200-NCS-2024
Brief Description	This use case allows users to view and update their personal information. Users can replace their profile photo and change to a new password for security purposes.
Actor	Public person, administrator, agencies and management approver
Pre-Conditions	The user already login to the system.
Basic Flow	The use case begins when Public User 1. The public user clicks <<PROFILE>> navigation option. 2. The system displays current’s information of public user. 3. The public user clicks <<EDIT>> button. [RQ-201-NCS-

2024]

4. The system displays personal information and account information.
5. The public user enters fields to be updated.
6. The public user clicks <<SAVE>> button. **[RQ-202-NCS-2024]**
7. The system saves changes made and displays a success message.
8. The use case ends.

Agencies

1. The agencies click <<PROFILE>> navigation option.
2. The system displays current's information of agencies.
3. The agencies click <<EDIT>> button.
4. The system displays agencies' information.
5. The agencies enter fields to be updated.
6. The agencies click <<SAVE>> button.
7. The system saves changes made and displays a success message.
8. The use case ends.

Administrator

1. The administrator clicks <<PROFILE>> navigation option.
2. The system displays current's information of the administrator.
3. The administrator clicks <<EDIT>> button.
4. The system displays personal information and employment details.
5. The administrator enters fields to be updated.
6. The administrator clicks <<SAVE>> button.
7. The system displays a success message.
8. The administrator clicks <<VIEW ALL USERS>> navigation

	option. [RQ-203-NCS-2024] 9. The system displays a list of all users (Public Users, Management Approver, Agencies) with details such as name, username, role and last login, total users, active users for last 24 hours and new users for last 7 days. 10. The administrator clicks name with blue-coloured that indicates a clickable link to view the user's profile. 11. The system displays a selected profile. 12. The administrator clicks <<ADD USER>> button. [RQ-204-NCS-2024] 13. The system displays a form to be filled. 14. The administrator enters details in required fields. 15. The administrator clicks <<SAVE>> button. 16. The system displays a confirmation message. 17. The use case ends. Management Approver 1. The management approver clicks <<PROFILE>> navigation option. 2. The system displays current's information of the management approver. 3. The management approver clicks <<EDIT>> button. 4. The system displays personal information and employment details. 5. The management approver enters fields to be updated. 6. The management approver clicks <<SAVE>> button. 7. The system displays a success message. 8. The use case ends.
Alternative Flow	None
Exception Flow	None
Post-Conditions	1. The changes made are successfully updated.

	2. The addition of new user to the system.
Rules	1. Fields like name, phone number and email cannot be left blank during profile update.
Constraints	None

3.2.2 Manage Profile Sequence Diagram

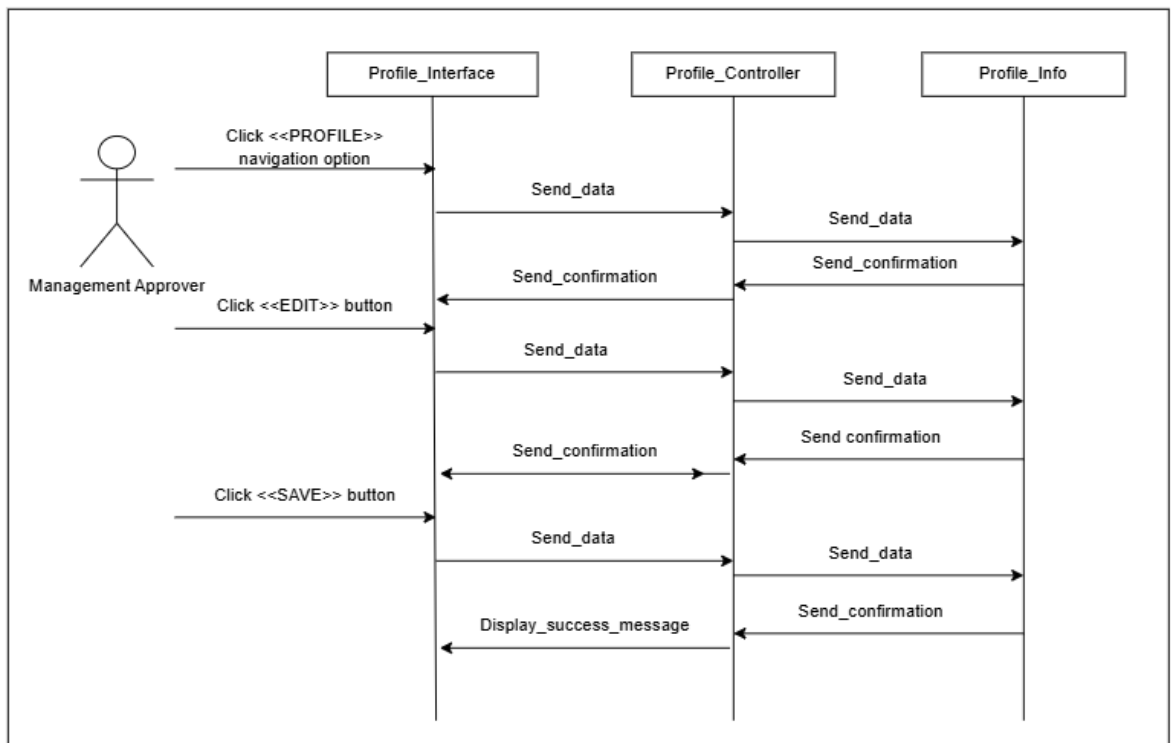

Figure 3.16 Basic Flow for Manage Profile (Management Approver)

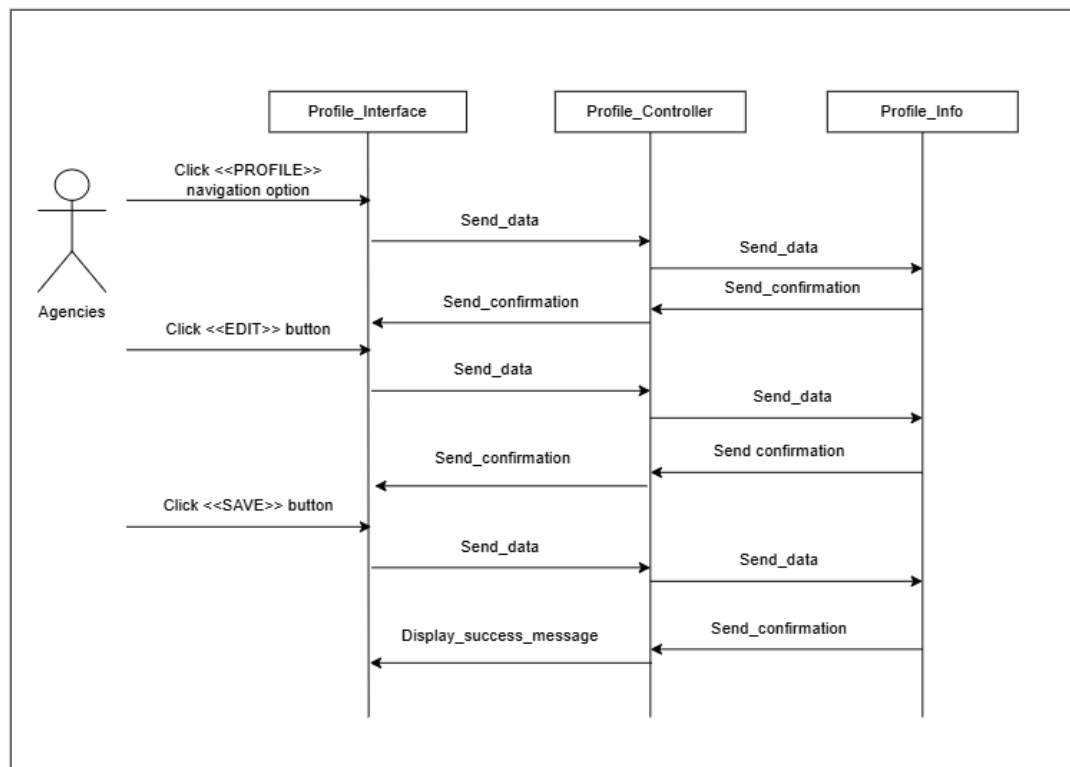

Figure 3.17 Basic Flow for Manage Profile (Agencies)

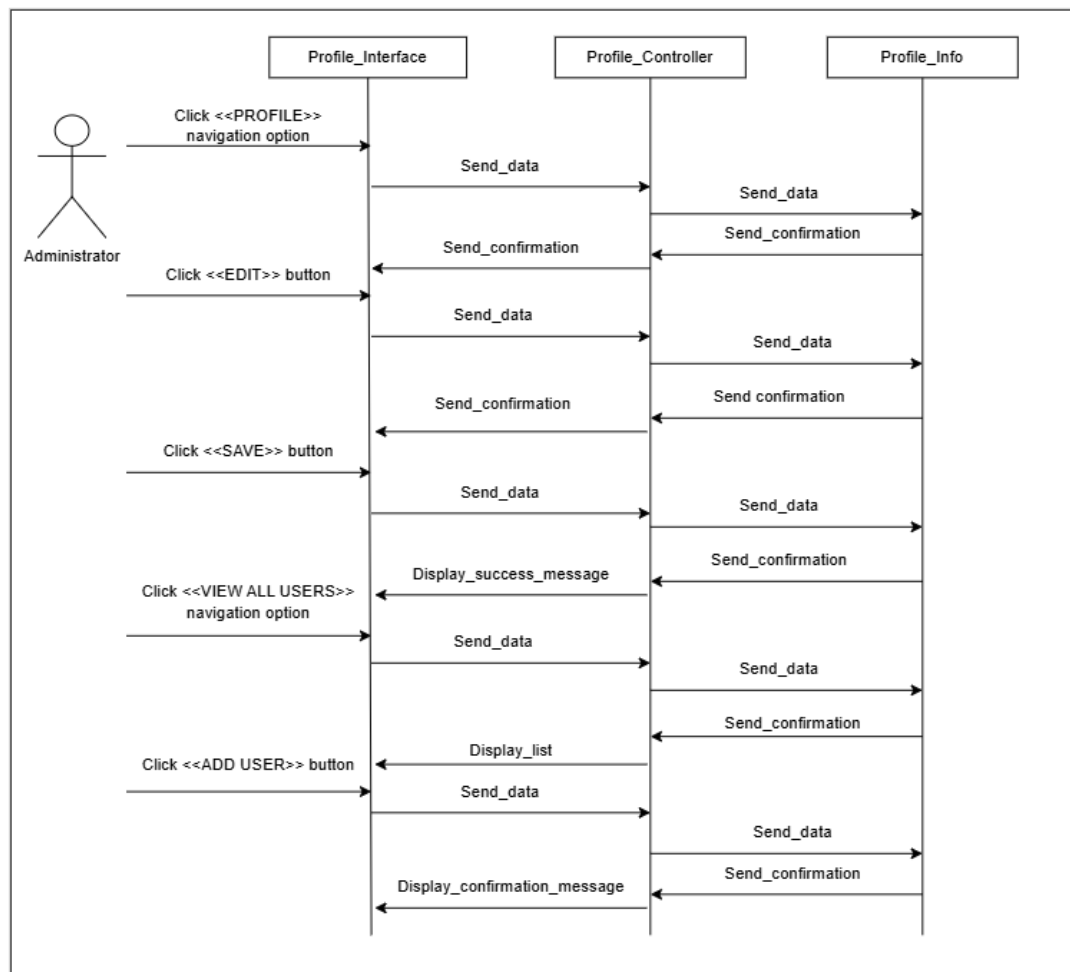

Figure 3.18 Basic Flow for Manage Profile (Administrator)

3.2.3 Manage Profile User Interface

The screenshot shows the 'Profile' page of the NewsCheck application. On the left is a dark blue sidebar with the 'NewsCheck' logo and a menu containing 'Home', 'News Category', 'Info', 'News Submission', 'Profile' (highlighted), and 'Settings'. The main content area has a top header with a search bar and notification/user icons. Below this, the 'Profile' section features a user card for 'Alif Asyraf' (Public User) with a profile picture icon and an 'Edit' button. The profile is divided into two sections: 'Personal Information' and 'Account Information'. The 'Personal Information' section displays fields for First Name (Alif), Last Name (Asyraf), Email (m_alif23@gmail.com), and Phone (0192346781). The 'Account Information' section displays Username (aasyraf_23) and Password (*****@006).

Figure 3.26 Edit Profile for Administrator

The screenshot shows the 'View All Users' page in the NewsCheck application. On the left is a dark sidebar with navigation links: Home, News Category, Info, News Submission, Profile (with a sub-link 'View All Users'), Reports, and Settings. The main content area has a search bar and a bell icon. Below the search bar, the title 'View All Users' is displayed. To the right of the title, summary statistics are shown: 'Total Users: 1,470', 'Active Users (Last 24 Hours): 291', and 'New Users (Last 7 Days): 35'. A blue 'Add User' button is located above a table of users. The table has four columns: Name, Username, Role, and Last Login. It lists ten users, including Diana Ariffin, Nur Fatini, and several official accounts like 'Jabatan Pengangkutan Jalan Malaysia' and 'Kementerian Pendidikan Malaysia'.

Name	Username	Role	Last Login

Figure 3.27 View All Users for Administrator

This screenshot shows the detailed profile of a user named Diana Ariffin. The sidebar and top navigation are identical to the previous figure. The 'View All Users' title is present, but instead of a list, it shows a detailed view for one user. At the top right of the profile section are two buttons: 'Reset Password' and 'Delete Account'. The profile includes a user card with a placeholder image, the name 'Diana Ariffin', the role 'Public User', and a green 'ACTIVE' status. To the right of the card are buttons for 'Login History', 'Usage Statistics', and 'Activity Logs'. Below the card is a 'Personal Information' section with fields for First Name (Diana), Last Name (Ariffin), Email (diana_ariffin@gmail.com), and Phone (0108793678). At the bottom is an 'Account Information' section showing the Registration Date (Jan 5th, 2025, at 10:30 AM) and Last Login (Mon, Jan 6th, 2025 at 3.57 PM).

Figure 3.28 View All Users for Administrator

The screenshot displays the 'View All Users' interface within the NewsCheck application. On the left is a dark sidebar with navigation links: Home, News Category, Info, News Submission, Profile (highlighted with a sub-link 'View All Users'), Reports, and Settings. The main content area has a light beige background. At the top of this area is a search bar and a user profile icon. Below the search bar is the title 'View All Users'. The form contains six labeled input fields: 'Name' (text), 'Role' (dropdown menu), 'Email Address' (text), 'Phone' (text), 'Username' (text), and 'Password' (text). At the bottom right of the form are two buttons: 'Cancel' (light blue) and 'Add User' (dark blue).

Figure 3.29 Add User for Administrator

Table 3.4 Manage Profile - User Interface Description

User Interface Name	Description
Profile for Public User	This page offers public user to view their profile details.
Edit Profile for Public User	This page enables public user to modify and update their profile details. This includes personal information such as first name, last name, email and phone number and account information such as username and password.
Profile for Management Approver	This page offers management approver to view their profile details.
Edit Profile for Management Approver	This page enables management approver to modify and update their profile details. This includes personal information such as first name, last name, email, phone number, username and password. Also, employment details such as role, department and date of hire.
Profile for Agencies	This page offers agencies to view their profile details.
Edit Profile for Agencies	This page enables agencies to modify and update their profile details. This includes agency information such as

	name, email and phone number and account information such as password.
Profile for Administrator	This page offers administrator to view their profile details.
Edit Profile for Administrator	This page enables administrator to modify and update their profile details. This includes personal information such as first name, last name, email, phone number, username and password. Also, employment details such as role, department and date of hire.
View All Users for Administrator	This page allows administrator to view a list of all users in the system. Administrator can click on the name displayed to view more detailed information of the profile. Administrator can also delete selected account and reset their password.
Add User for Administrator	This page allows administrator to manually add any new users to the system. Administrator needs to select a role and fills in required information.

3.3 Manage Generate Report

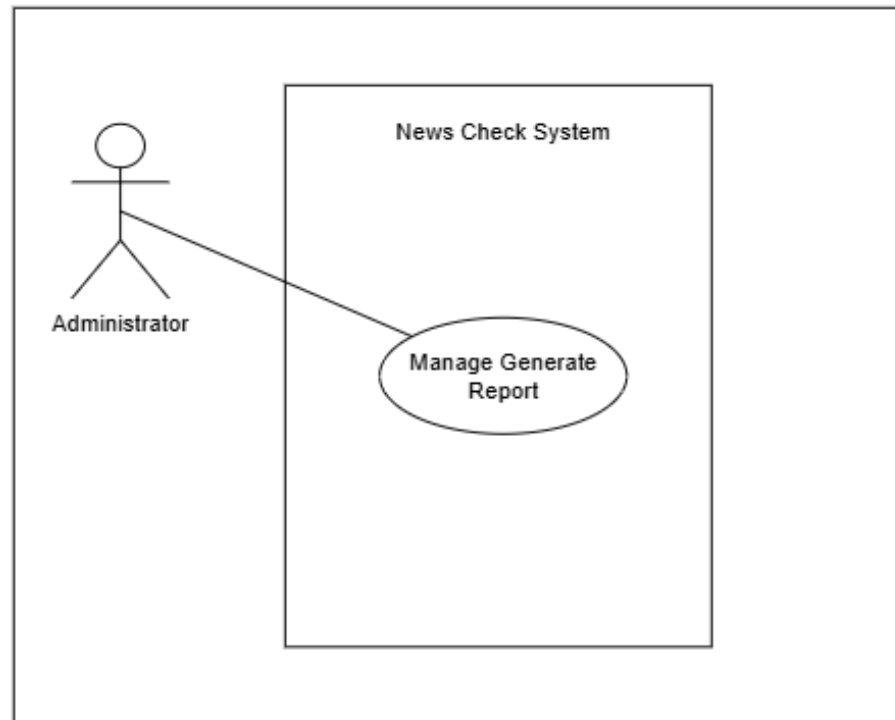

Figure 3.31 Manage Generate Report Use Case

3.3.1 Manage Generate Report Use Case Description

Table 3.5 Use Case Description for Manage Report

Use Case ID	UC-300-NCS-2024
Brief Description	This use case allows the administrator to generate report of user activity.
Actor	Administrator
Pre-Conditions	The administrator already login to the system.
Basic Flow	The use case begins when 1. The administrator clicks <<REPORT>> navigation option. 2. The system displays a list of report categories. 3. The administrator clicks <<LOGIN ACTIVITY REPORT>>. 4. The system displays time range to generate the report.

	5. The administrator selects date from and date to for which the login activity report will be generated. 6. The administrator clicks <<GENERATE REPORT>> button. [RQ-301-NCS-2024] 7. The system displays a list of total logins, successful logins, failed logins along with the rates. 8. The administrator clicks <<DOWNLOAD>> button to save the report. [RQ-302-NCS-2024] 9. The system displays a success message. 10. The use case ends.
Alternative Flow	None
Exception Flow	None
Post-Conditions	The administrator can generate, view and download the generated report when required.
Rules	None
Constraints	None
