1. INTRODUCTION

1.1 PURPOSE

The purpose of this document is to provide a detailed description for the News Check System which focuses on its requirements and how it will help the public in verifying news. We aim to understand the functionalities of the system and how the system will be used. Additionally, it describes the system's objectives, specifications, including identification and interfaces for each functional requirement. These documents must be presented to the clients for approval and to serve as a reference for the development team to fully understand the system's requirements. (Binding contract with developer/stakeholder)

1.3 SYSTEM OVERVIEW

The News Check system is designed to help users in verifying the legitimacy of news articles, social media posts, and other forms of information to minimize the spread of false information. The system acts as a reliable tool by checking articles, sources and data for factual accuracy and reliability. The software of the system involves various users which are Public User, MCMC: Administrator, MCMC: Management Approver and Agencies. The system is divided into three modules, each addressing a specific aspect of the verifying news process:

Module 1: Comprehensive profile data for all users.

This module stores detailed profile data for all users, including Public User, MCMC: Management Approver, MCMC: Administrator and Agencies. For Public User, they are required to register their contact details, including first name, last name, email address, phone number, username and password. They can subsequently log in to the system using their registered credentials. For MCMC: Administrator, they access the system by using a default username and password to monitor system activity. MCMC: Management Approver and Agencies receive their assigned usernames and passwords by the MCMC: Administrator, which they use to login to the system. Comprehensive profile data for all users can provide a range of valuable reports depending on the data categories obtained, including total logins over a period, successful logins and failed logins of the user along with the percentage.

Module 2: Capability to submit forms for the verification of news validity.

This module allows public users to report unverified or suspicious news for verification. Public users enter details such as subject, select category, description, news URL, source of the news and evidence before submitting the form. They need to upload relevant evidence such as screenshot comments from the news platform to support their submission. For the category selection, this is to enable user to select the appropriate category such as disaster, economy, education, crime and health. By using this category selection, MCMC: Administrator can quickly assign the submission to the relevant

Agencies depending on the report. MCMC: Management Approver needs to review the news submission that was submitted by the public user to ensure the details given are correct. For Agencies, they can view list of the news submission from the public user. MCMC: Administrator can view the list of the news submission and generate reports showing the list of news forms submitted. These reports will include the submission id, news category, subject, submission date and assigned agency.

Module 3: Classification of complaint forms forwarded to the appropriate authorities.

This module provides for classifying complaints or submissions into appropriate agency categories. Once a Public User submits a report, the system analyzes the given details such as subject, select category, description, news URL, news source and evidence. Based on this input, the MCMC: Administrator is assigned to submit the complaint to the relevant agency for further action. MCMC: Administrator needs to see each submission news and classify it by selecting the existing agency in the system. Before the MCMC: Administrator classifies the submission news to the agency, the MCMC: Management Approver needs to check the submission news first and give a pass or reject response after the public users send their submission news. For Agencies assignments, they can see all the submission news after the MCMC: Administrator classified the submission news form. Then the new agency can do any response to all submission news that involves their agency. For reports, MCMC: Administrator can generate all news submission reports that are sent the most by Public User according to Agencies.

2. PRODUCT DESCRIPTION

2.1 PRODUCT PERSPECTIVE

Figure 2.1 shows the context diagram of the News Check System. This figure illustrates the overall system functions and interactions within the system. The system involves four external entities which are Public User, MCMC: Administrator, MCMC: Management Approver and Agencies.

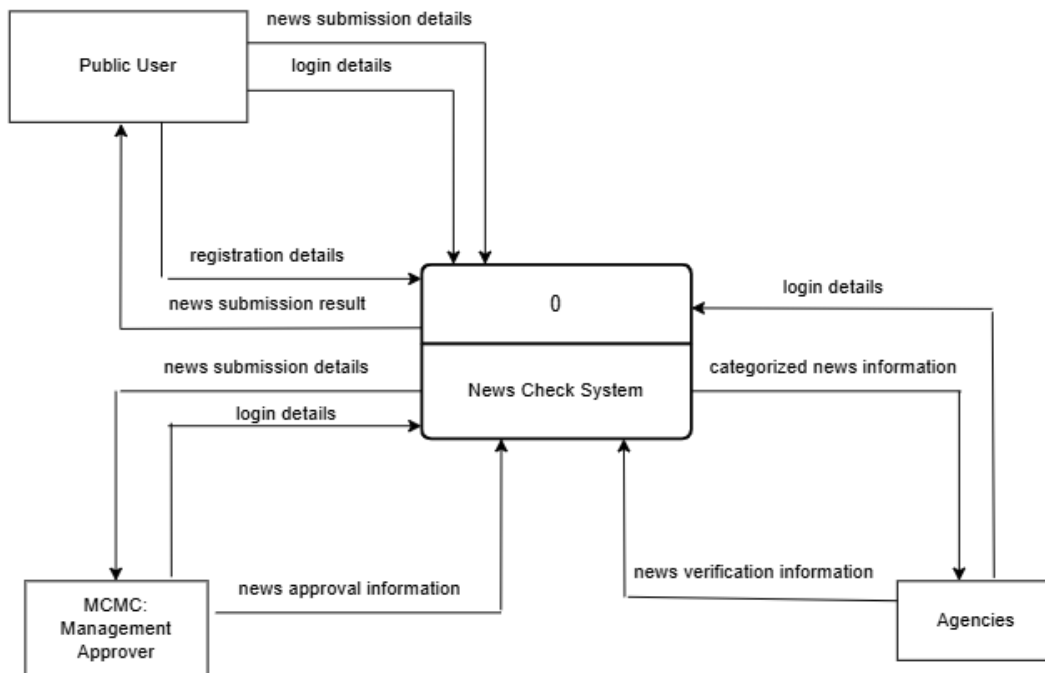

Figure 2. 1 Context Diagram of News Check System

2.2 PRODUCT FUNCTION

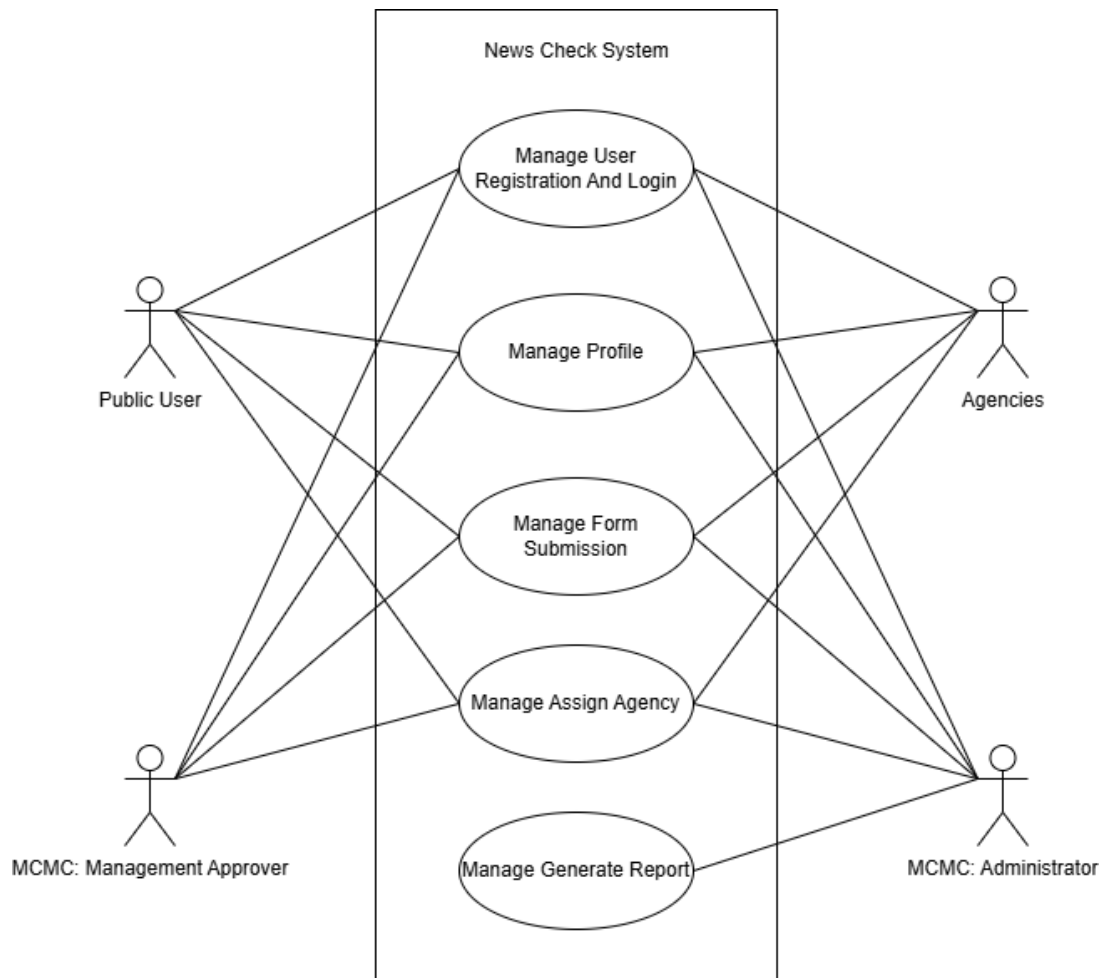

Figure 2. 2 Use Case Diagram of News Check System

2.3 USER CHARACTERISTICS

The News Check System (NCS) has four main users:

Table 2. 1 User characteristics

User	Educational Level	Experience	Technical Expertise
Public User	Basic education to higher education.	Have experience with similar systems.	Proficient in using basic internet and capable of filling in verifying news forms.
MCMC: Administrator	At least diploma or bachelor's degree in IT, computer science or related field.	Know how to manage system operation and digital platform.	Proficient in database management and monitoring system workflow.
MCMC: Management Approver	At least diploma or bachelor's degree in public administrator or related field.	Experience in decision-making, reviewing and approving processes.	Proficient in navigating the system to review and approve reports.
Agencies (e.g. PDRM, KKM, KPM, JBPM, MOF)	Bachelor's degree or training in their specialized field relevant to the agencies	Experience in analyzing the verifying news form and can verify the news based on data from their agencies.	Proficient in investigating digital evidence to verify the authenticity of news sources.

3. SPECIFIC REQUIREMENTS (SOFTWARE PRODUCT FEATURES)

3.3 Manage Form Submission

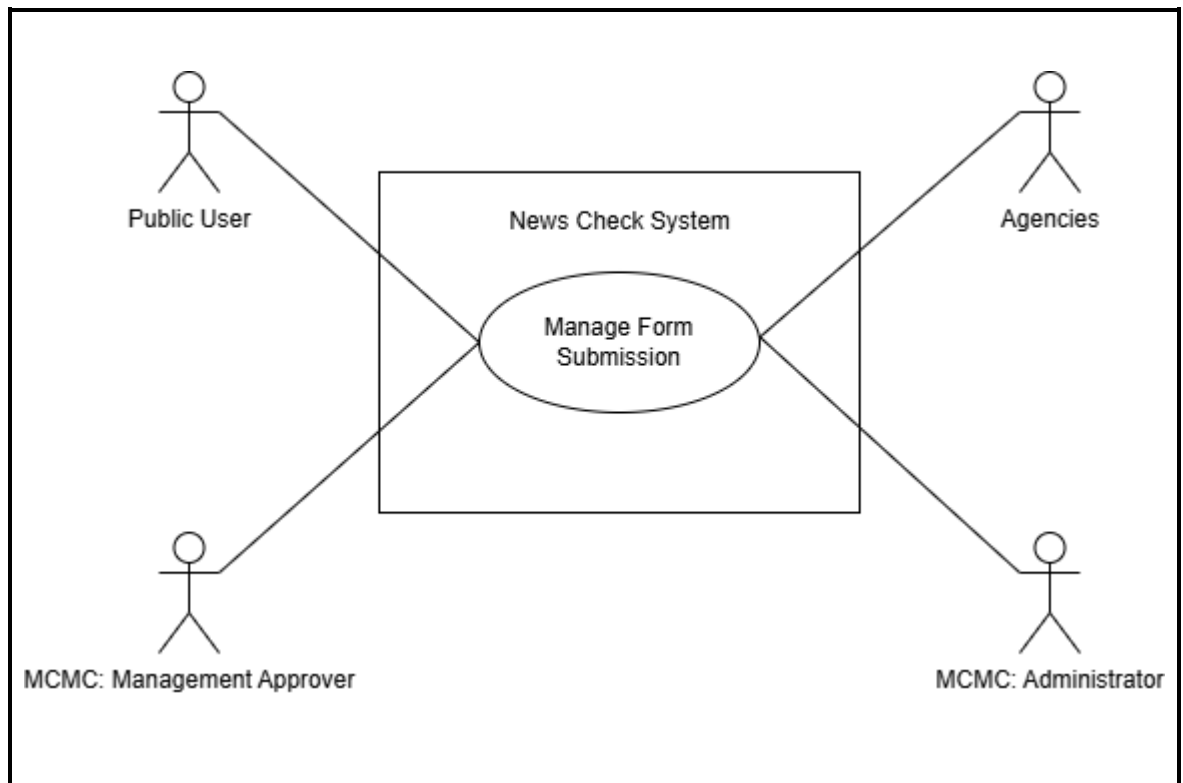

Figure 3. 1 Use Case Manage Form Submission

3.3.1 Manage Form Submission Use Case Description

Table 3. 1 Use Case Description for Manage Form Submission

Use Case ID	UC300-NCS-2024
Brief Description	This use case is initiated by a Public User. It allows the Public User to submit a news that suspicious with relevant details and evidence. MCMC: Management Approver will review the news submission and approve or reject the news submission. MCMC: Administrator and Agencies can view the list of submission.
Actor	Public User, MCMC: Administrator, MCMC: Management

	Approver, Agencies
Pre-Conditions	Public User, MCMC: Administrator, MCMC: Management Approver, Agencies already log in to the NCS. [RQ301-NCS-2024]
Basic Flow	Public User 1. The use case begins when a Public User clicks on the <<News Submission>> and <<Submit News>> menu in the navigation panel. 2. NCS displays the "Submit News" page. 3. The Public User fill in the required fields such as subject, news category, description, news URL, news source and upload evidence. [RQ302-NCS-2024] 4. The Public User clicks on the <<Submit>> button. [RQ303-NCS-2024] 5. NCS validates the input for completeness and correctness. [E1: Missing data in mandatory fields] 6. If the input is valid, NCS saves the form, generate submission ID and displays a confirmation message to the Public User. 7. Public User will be able to view the status of news submission they submit. 8. Public User click on <<Submission History>> menu in the navigation panel. 9. NCS displays "Submission History" page with information such as submission id, news category, submission date, status and <<View>> button. [RQ304-NCS-2024] 10. The use case ends. MCMC: Management Approver 1. The use case begins when MCMC: Management Approver click on <<News Submission>> and <<List>>

	menu in the navigation panel. 2. NCS displays "List of News Submission" page with list of information such as submission id, news category, submission date, status, assigned agency and <<View>> button. [RQ305-NCS-2024] 3. The MCMC: Management Approver click on <<View>> button. 4. NCS displays "Review News Submission" page with details of submission id, subject, news category, description, news URL, news source, Public User username, evidence and <<Approve>> and <<Reject>> button. [RQ306-NCS-2024] 5. The MCMC: Management Approver review the news submission. 6. The MCMC: Management Approver click on <<Approve>> button to approve the news submission or click on <<Reject>> button to reject the news submission. [RQ306-NCS-2024] 7. NCS update the status of the news submission on "List of News Submission" page. 8. The use case ends. MCMC: Administrator 1. The use case begins when MCMC: Administrator, click on <<News Submission>> and <<List>> menu in the navigation panel. 2. NCS displays "List of News Submission" page with list of information such as submission id, news category, submission date, status, assigned agency and <<View>> button. [RQ305-NCS-2024] 3. The use case ends.
--	--

	Agencies 1. The use case begins when Agencies click on <<News Submission>> and <<List>> menu in the navigation panel. 2. NCS displays "List of News Submission" page with list of information such as submission id, subject, submission date, review status and <<View>> button. [RQ305-NCS-2024] 3. The use case ends.
Alternative Flow	Not applicable
Exception Flow	Public User E1: Missing data in mandatory fields 1. NCS detects incomplete or invalid input. 2. NCS highlights the missing fields and displays an error message. 3. The use case continues to step 3 in the basic flow.
Post-Conditions	The news submission details submitted by the Public User are saved.
Rules	Not applicable
Constraints	1. Only logged-in MCMC: Administrators, MCMC: Management Approver and Agencies can access the <<List>> menu. 2. Public User must complete all required fields before submitting the form.

3.3.2 Manage Form Submission Sequence Diagram

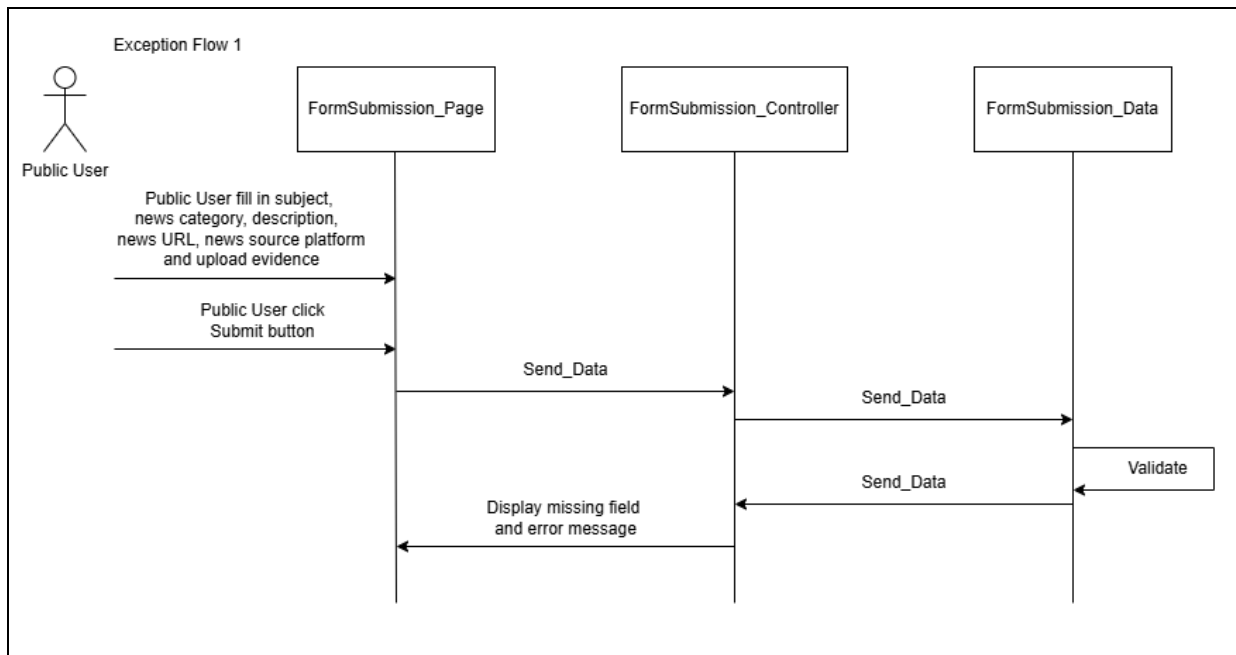

Figure 3. 6 Exception Flow for Manage Form Submission Public User

3.3.3 Manage Form Submission User Interface

The screenshot shows the 'NewsCheck' application interface. On the left is a dark blue sidebar with navigation links: Home, News Category, Info, News Submission (highlighted), Submission History, Profile, and Settings. The top header is dark blue with a search bar, a bell icon, and a user profile icon. The main content area is titled 'Submit News' and contains a form with the following fields: 'Subject*' (text input), 'News Category*' (dropdown menu), 'Description*' (text area), 'News URL*' (text input), 'News Source*' (dropdown menu), and 'Evidence*' (with a 'Choose Image' button and 'No Image chosen' text). A 'Submit' button is located at the bottom of the form.

Figure 3. 7 News Submission Form for Public User

This screenshot shows the same 'Submit News' form as Figure 3.7, but with sample data entered. The 'Subject*' field contains 'HMPV virus', 'News Category*' is set to 'Health', 'Description*' contains 'HMPV virus already in Malaysia since last year', 'News URL*' contains 'https://www.facebook.com/share/p/19lFI55CsZ/', and 'News Source*' is set to 'Facebook'. The 'Evidence*' field is highlighted with a red error message 'This Field Is Required' because it is empty. The 'Choose Image' button and 'No Image chosen' text are still present. The 'Submit' button remains at the bottom.

Table 3. 2 Manage Form Submission - User Interface Description

User Interface Name	Description
News Submission Form for Public User	This page allows Public User to fill out the required field with accurate information such as subject, choose news category, description, news URL, choose news source and upload evidence before submitting the form.
Missing Data in Mandatory Fields for Public User	This page shows the Public User the required field that they don't fill out after they click the submit button.
Confirmation Message for Public User	This page shows the confirmation message that appears if all the required field fill by the Public User.
Status of News Submission for Public User	This page can be seen after the Public User clicks <<Submission History>> at the menu. The Public User can see the submission id, news category, submission date and the status of the news submission either approved or rejected.
List of News Submission	This page shows the list of news submission to MCMC:

for MCMC: Management Approver	Management Approver with details such as submission id, news category, status and assigned agency.
Review News Submission for MCMC: Management Approver	This page shows the details of the news submission form and allows MCMC: Management Approver to review the news submission. The MCMC: Management Approver need to decide to approve or reject the news submission.
Updated List of News Submission for MCMC: Management Approver	This page is the update of the list of news submission for the MCMC: Management Approver after the review.
List of News Submission for MCMC: Administrator	This page allows the MCMC: Administrator to see the list of news submission.
List of News Submission for Agencies	This page allows the Agencies to see the list of news submission that assigned to them.

3.5 Manage Generate Report

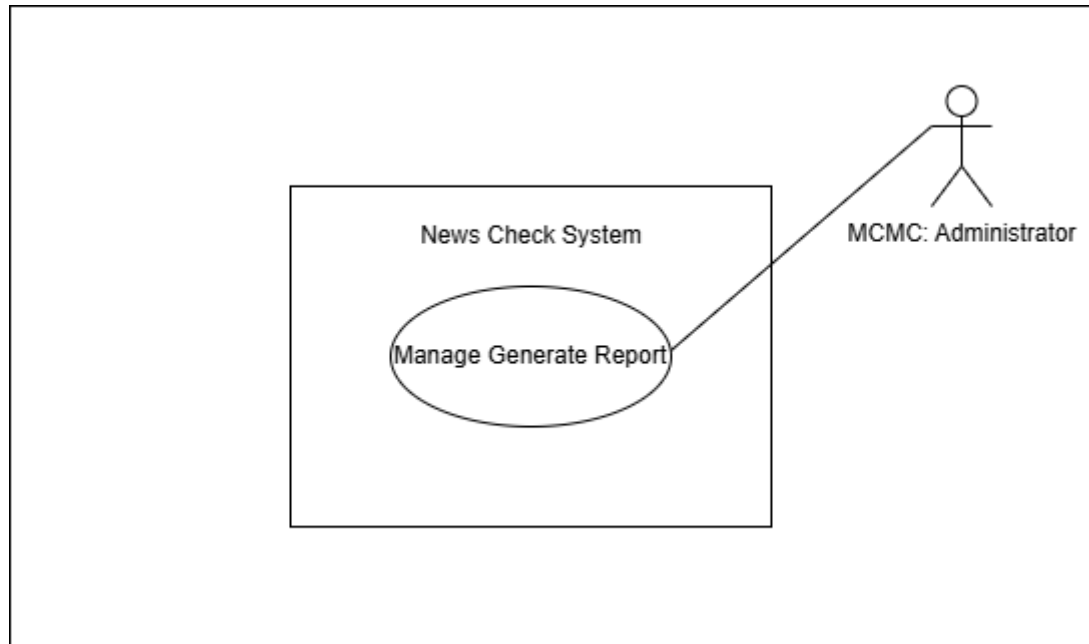

Figure 3. 16 Manage Use Case Generate Report

3.5.1 Manage Generate Report Use Case Description

Table 3. 3 Use Case Description for Manage Generate Report

Use Case ID	UC500-NCS-2024
Brief Description	This use case allows MCMC: Administrator to generate and view reports about the news submission entry. The MCMC: Administrator can filter the report by date and download the report.
Actor	MCMC: Administrator
Pre-Conditions	MCMC: Administrator already log in to the NCS. [RQ501-NCS-2024]
Basic Flow	1. The use case begins when MCMC: Administrator clicks on the <<Report>> in the navigation panel. 2. NCS displays "Reports" page with the <<Login Activity Report>>, <<News Entry Report>> and <<Ranking News Categories Report>> button. [RQ502-NCS-2024] 3. The Administrator clicks on <<News Entry Report>>

	button. 4. NCS displays a “Reports” page with the field to fill in. 5. The MCMC: Administrator fills in the date range. [RQ503-NCS-2024] 6. The MCMC: Administrator clicks on <<Generate Report>> button. [RQ504-NCS-2024] 7. NCS generates the report. 8. NCS displays requested report. 9. The MCMC: Administrator clicked on the <<Download>> button. [RQ505-NCS-2024] 10. NCS displays successful message. 11. The use case ends.
Alternative Flow	Not applicable
Exception Flow	Not applicable
Post-Conditions	The report is generated and is available for MCMC: Administrator to view and download.
Rules	Not applicable
Constraints	Only MCMC: Administrator are allowed to generate report.
